

Energy Management Training **for State Agencies and Higher Education Institutions** facilities, maintenance and management staffs

Session #2: Optimizing Energy Performance for Fall
October 18, 2006 – 2:00PM-3:30PM

During this no-cost, interactive tele-conference you will:

- Learn how to optimize operations during the fall season and prepare your facility for peak winter performance.
- Learn effective energy management strategies and get real-world experiences from energy/facility managers in state department and higher education facilities.
- Enhance your skills.
- Share your experiences with your peers in the interactive session.
- Expand your network of resources.
- Learn about Rebuild Colorado's many resources and technical services available to help in new building design, existing building upgrades, and energy management.
- Receive a certificate of training for Professional Development Hours.
